

SURAJ GUPTA

AI Engineer & Full-Stack Developer

+91 6263117774 | surajg7774@gmail.com | github.com/surajg7774 | linkedin.com/in/suraj-gupta-493502210 | Khargone, Madhya Pradesh, India

SUMMARY

Building production-ready AI applications and scalable full-stack software that solve real-world problems through modern engineering. Comfortable across the stack: enterprise-grade backend systems (Spring Boot, Spring Security, REST APIs, role-based access control), React front ends, and applied AI pipelines (RAG, OCR, vector databases, NLP). Completed PG-DAC at CDAC ACTS in 2025 and currently advancing through CDAC ACTS' PGCP-AI program. Seeking full-time opportunities as an AI Engineer or Full-Stack Developer.

CORE SKILLS

Languages: Java, Python, JavaScript, SQL
Backend / Frontend: Spring Boot, Node.js, FastAPI | React
AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, RAG, LangChain
Databases: MySQL, MongoDB, ChromaDB
Cloud / Dev Tools: AWS, Vercel, Railway | Git, Docker, Postman

PROJECTS

SG Krashi — Smart Agriculture Ecosystem Platform | Solo Project | 1 month

[View Live Site →](#)

Tech: React 19, TypeScript, Vite, MUI, Java 21, Spring Boot, Spring Security, JWT, MySQL, Razorpay, Google Gemini, Cloudinary, Brevo

- Architected and built a live, multi-vertical platform (organic farming, dairy, equipment rental, farm stays, product store, crop marketplace) solo across 20 formally-scoped modules, with real Razorpay payments in production.
- Built AI Crop Doctor: photo-based crop disease diagnosis via Google Gemini with a retrieval-augmented (RAG) knowledge layer, confidence bands instead of fabricated percentages, and a declared-crop mismatch cross-check.
- Designed a generic booking engine powering both Equipment Rental and Farm Stay, plus a recommendation system and predictive analytics (revenue forecasting, stock-out risk).
- Impact: A real, live platform running six business lines for an actual agriculture business — not a tutorial project.

Cross-Border Ingredient Safety & Compliance System | Team Project | 1 month

Tech: Python, FastAPI, Streamlit, LangChain, ChromaDB, PaddleOCR, OpenCV, Pydantic

- Built an AI-powered platform that extracts ingredient text from product labels using PaddleOCR/OpenCV and normalizes 18,000+ ingredients into a unified reference set.
- Implemented a LangChain-based RAG pipeline backed by ChromaDB to run evidence-based compliance checks against multiple countries' food regulations.
- Generated explainable, auditable compliance reports (PDF/JSON/CSV) that flag banned, restricted, and permitted ingredients with cited regulatory evidence.
- Impact: Turned a manual, error-prone label-compliance check into an automated pipeline usable by a non-expert.

Bharat Fix (Complaint Management System) | Team Project | 1 month

Tech: Java, Spring Boot, React, MySQL, Spring Security, JWT, Google Maps API

- Developed a complaint management system enabling citizens to register and track complaints with Google Maps location pinning.
- Implemented OTP-based authentication and role-based access control (User/Staff/Admin) secured with Spring Security and JWT.
- Built RESTful APIs for complaint status tracking, assignment, and workload management across staff and admin roles.
- Impact: A working model for transparent civic complaint resolution instead of issues disappearing into a queue.

Flight Booking System | Team Project | 1 month

Tech: Spring Boot, React, Node.js

- Built a microservices-based flight booking web application splitting concerns across independently deployed services.
- Designed RESTful APIs enabling users to search flights and make bookings, with admin capabilities for flight-data management.
- Coordinated state and communication across services instead of relying on one shared database.
- Impact: Hands-on experience with the microservices patterns used in real production booking systems.

EDUCATION

PGCP-AI (Post Graduate Certification Program in Artificial Intelligence) — CDAC ACTS	Feb 2026 batch — Ongoing
PG-DAC (Post Graduate Diploma in Advanced Computing) — CDAC ACTS, Pune	2025 · 76.4%
B.Tech, Computer Science & Engineering — Sushila Devi Bansal College of Engg, Indore (RGPV Bhopal)	2024 · 77.6%
Class XII (PCM) — Govt. Devi Ahilya Excellence H.S. School No.1, Khargone (M.P. Board)	2020 · 66.4%
Class X — Govt. Devi Ahilya Excellence H.S. School No.1, Khargone (M.P. Board)	2018 · 74.6%

CERTIFICATIONS

PGCP-AI (Post Graduate Certification Program in Artificial Intelligence) — CDAC ACTS

EXTRACURRICULAR

- Active member, E-Cell (Entrepreneurship Cell) — organized workshops, business plan competitions, and speaker sessions.
- Sports Captain, School | Volunteer, National Service Scheme (NSS).
