

SURAJ GUPTA

AI Engineer & Full-Stack Developer

surajg7774@gmail.com | github.com/surajg7774 | linkedin.com/in/suraj-gupta-493502210 | Khargone, Madhya Pradesh, India

SUMMARY

AI Engineer & Full-Stack Developer with a production-oriented approach to building software — from enterprise-grade backend systems (Spring Boot, Spring Security, REST APIs, role-based access control) to applied AI pipelines (RAG, OCR, vector databases, NLP). Currently completing a PG Diploma in Advanced Computing at CDAC ACTS. Comfortable across the stack: designing APIs, building React front ends, and shipping AI-powered tools that go beyond notebooks into working, report-generating systems. Seeking full-time opportunities as an AI Engineer or Full-Stack Developer.

SKILLS

Languages: Java, Python, JavaScript, SQL

AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, Data Analytics

Frameworks & Libraries: Spring Boot, React, Node.js, FastAPI

Databases: MySQL, MongoDB, ChromaDB

Tools & Platforms: Git, Docker, Postman, AWS

PROJECTS

Cross-Border Ingredient Safety & Compliance System | Team Project 2 months

Tech: Python, FastAPI, Streamlit, LangChain, ChromaDB, PaddleOCR, OpenCV, Pydantic

- Built an AI-powered platform that extracts ingredient text from product labels using PaddleOCR/OpenCV and normalizes 18,000+ ingredients to official INS/E numbers.
- Implemented a LangChain-based RAG pipeline backed by ChromaDB to run evidence-based compliance checks against multiple countries' food regulations.
- Generated explainable, auditable compliance reports (PDF/JSON/CSV) that flag banned, restricted, and permitted ingredients with cited regulatory evidence.

Bharat Fix | Team Project 2 months

Tech: Java, Spring Boot, React, MySQL, Spring Security, JWT, Google Maps API

- Developed a complaint management system enabling citizens to register and track complaints with Google Maps location pinning.
- Implemented OTP-based authentication and role-based access control (User/Staff/Admin) secured with Spring Security and JWT.
- Built RESTful APIs for complaint status tracking, assignment, and workload management across staff and admin roles.

Flight Booking System | Team Project 2 months

Tech: Spring Boot, React, Node.js

- Built a microservices-based flight booking web application simulating real-world booking operations.
- Designed RESTful APIs enabling users to search flights and make bookings, with admin capabilities for flight-data management.
- Focused on clean, scalable architecture and clear API design across service boundaries.

EDUCATION

PG Diploma in Advanced Computing (PG-DAI) — CDAC ACTS, Pune Feb 2026 batch (in progress)

B.Tech, Computer Science & Engineering — Sushila Devi Bansal College of Engineering, Indore (RGPV, Bhopal) 2024 · 77.6%

Class XII (PCM) — Govt. Devi Ahilya Excellence H.S. School No.1, Khargone (M.P. Board) 2020 · 66.4%

Class X — Govt. Devi Ahilya Excellence H.S. School No.1, Khargone (M.P. Board) 2018 · 74.6%

CERTIFICATIONS

Post Graduate Diploma in Advanced Computing — CDAC ACTS, Pune

Covers Java, data structures, databases, web technologies, and full-stack application development.

EXTRACURRICULAR

- Active member, E-Cell (Entrepreneurship Cell) — organized workshops, business plan competitions, and speaker sessions.
- Sports Captain, School.
- Volunteer, National Service Scheme (NSS).
